Subject Index

alumina, 95
amino acid concentration, 181
asymmetric membrane, 231

bacteriorhodopsin, 171
Ba^{2+}-18-crown-6 carrier, 29

capillary space-charge model, 1
carrier, 155
catalyst recovery, 37
charged ultrafiltration membrane, 47
CO_2 removal, 119
composite membranes, 57
concentration driven permeation of SO_2, 87
concentration polarization, 241
conductivity, 207
counterion separation, 1, 19
cross flow filtration, 281
cyanide ion, 155

demulsification, 181
dextran, 95
dextransulfate, 47
di-2-ethylhexyl phosphoric acid, 181
diffusion, 57, 67, 263
dual-sorption model, 67

electrolyte mixtures, 1
electrostatic barrier, 47
energy saving, 281

facilitated transport, 127
fermentation broth, 181
filtration, 95
fine-porous model, 19
flux enhancement, 281
fouling, 291

gas and vapor permeation, 67, 193, 263
gas separations, 57

$Hg(NO_2)_4^{2-}$ anion, 29
hollow fibre modules, 119
homogeneous catalysis, 37
hydration capacity, 207
hydrophobic membranes, 119

inorganic membranes, 57
intrinsic rejection, 241
ion-dipole complexes, 207
ion-exchange membranes, 207
ionic mobilities, 19
IR gas analysis, 87
irreversible thermodynamics, 1

life-support system, 119
liquid emulsion membrane, 181
liquid membranes, 29, 127, 137, 155

mass transfer, 145
membrane, 95
membrane formation, 103
membrane hydrodynamics, 145
mercury transport, 29
micellizing solute, 241
microfiltration, 291
microporous and porous membranes, 67
mineral membrane, 281
mixture permeation, 67

NO_2 and CO, 87
NO detoxication, 37
nonsolvent additive, 103
numerical analysis, 19

oxalate, 95
oxygen enrichment, 103

pertraction, 137
pervaporation, 231
phase inversion process, 231
photoresponse, 171
plasma polymerization, 87
plate module, 145
polyacrylamide gel, 171
polyacrylonitrile, 47
polycarbonate, 103
polyimide, 231
polyphosphazene membranes, 57
poly[1-(trimethylsilyl)-1-propyne], 67
pressure-driven transport, 1, 19
proton pump, 171
pulsating flow, 281

purple membrane, 171

reverse osmosis, 37, 145

salt effects, 47
selectivity enhancement of gas sensors, 87
silicon organic membranes, 87
silver extraction, 137
sol-gel, 95
solubility and partitioning, 263
stirring, 127
structural image, 207
sulfide detoxication, 37
surfactants, 291

ternary electrolyte mixtures, 19
tetraphenylporphinatomanganese(III) complex, 155
theory, 193, 263
thermodynamics, 263
thiosulfate, 29
tri-isobutylphosphine sulfide, 137

ultrafiltration, 241
unstirred batch cell, 241
uphill transport, 155

water/ethanol separation, 231
water transport number, 207
wet phase inversion, 103
wine clarification, 281

zirconia, 95
